Problem Statement for Analyzing Vehicle Performance Using Machine Learning

Customer

can able

To predict the Mileage

so that

The Fuel Consumption is Noted.

Customer

need a way to

Improve the Certain behaviours of the vehicle

inorder to

Enhance the performance of the Car.

Customer

needs to

Observe the Performance Objectives

for

the prediction engine and engine management system.

Customer

want to

Maintain the health of the car

by

The performance analysis of the car based on the engine type etc.
