Project Design Phase-II
Data Flow Diagram & User Stories
Date	03 October 2022
Team ID	PNT2022TMID10856
Project Name	Project – Data Flow Diagram
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.
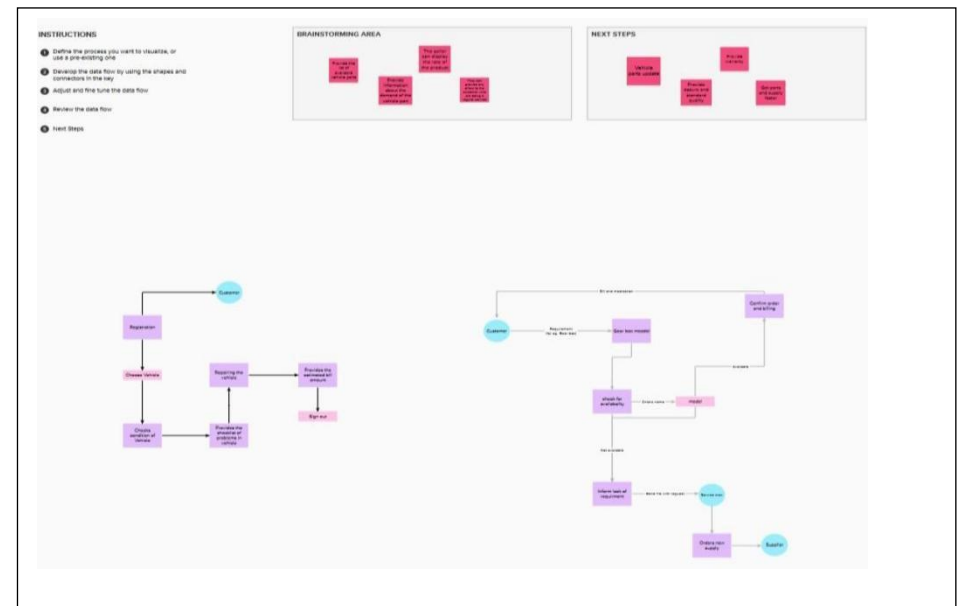

Example: (Simplified)

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

Example: DFD(Level 0) diagram

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer	User Input	USN-1	As a customer, I can give input about the car to the application.	I can access my User Input box to edit my Input	High	Sprint-1
Admin		USN-2	As a admin, I will check the availability of model.		High	Sprint-1
		USN-3	After checking, If available, Proceed to the service and process the model.		High	Sprint-1
		USN-4	And Displays the calculated Performance Of the Vehicle.		High	Sprint-1
